

Carrying AV Technology Into The Future

Padded Hard Side Travel Cases

NOTE: PADDED CASES ARE NOT SUITABLE FOR SHIPPING OR AIRLINE CHECK-IN

Our padded hard side travel cases are manufactured of black Dupont Original™ Ballistic nylon fabric for durability and moisture resistance. The interior is built of firm industrial grade foam and rigid ABS plastic for protection. All cases feature heavy-duty, smooth sliding YKK zippers.

Some models have a removable, laptop computer case*. (See picture of "RP" style case below). All padded hard side cases include a non-slip handle (extends from 36" to 43") and NEW ball-bearing "skate" wheels for travel convenience.

An extension platform pulls out for stability and extra items that may need to be carried.

Our padded hard side travel cases are designed as carry-on luggage (most fit in an airplane's overhead rack).

The interior of these cases include the added shock protection of an ABS plastic insert sandwiched between two layers of foam and fabric.

"RP" style padded hard side travel cases feature a removable laptop computer case to use your computer

at your seat on a plane, or for trips when you don't need a laptop computer. It actually gives you two-cases in one!

Our exclusive "RP" feature allows you to remove the exterior mounted laptop computer case for instances when you want to use your computer at your seat on a plane.
