- Simple forward, reverse, and blank screen control
- Sharp, integrated laser pointer
- Works with most presentation software
- Great battery life and 12-month warranty
- Conveniently stores in notebook computer's PCMCIA slot
- Credit card size remote

\$69.99 plus UPS Ground

Power Presenter RF

The Power Presenter RF comes packaged complete with everything you need right out of the box. A base receiver, the palm sized wireless remote, one PS2 and USB cable for universal functionality, and an attractive carrying case.

There is no software to load! The Power Presenter RF is able to use either the USB or the PS2 port, you simply plug and play.

The Power Presenter RF utilizes a unique system, which combines a simple operation with a secure 64-bit code encrypted radio frequency transmission technology that ensures superior transmission and eliminates interference. This Code Encrypted technology also allows multi users within a small environment like classrooms or multiple boardrooms by eliminating the probability of accidentally controlling another person's presentation or worse – them controlling yours!

Transmitter

- Range: Over 150 ft., depending upon operating environment
